MCU ANTIMICROBIAL ADDITIVE

is a liquid additive for MCU 55 and MCU 85 No Odor moisture cure urethane to protect against organic growth on the coated surface. It has superior resistance to bacteria, molds & algae as well as weather resistance for long term protection.

ADD TO 5 GALS.
OF MCU

INHIBITS THE GROWTH OF
BACTERIA, MOLDS & ALGAE

KEY FEATURES & TYPICAL BENEFITS

1. Long term protection against bacteria, molds and algae.
2. Liquid formula that easily mixes into MCU on the job site.
3. Economical choice when an antimicrobial coating is needed.
4. Reduces inventory costs & allows for more floor space as opposed to stocking standard antimicrobial coatings.

RECOMMENDED APPLICATIONS

Pharmaceutical Manufacturing | Hospitals | Corrections Centers | Animal Clinics and Kennels
Restrooms | Basements | Patios | Many other surfaces where bacteria growth is not permissible.
